

Applied Behavior and Learning Consultants

Major Areas of Focus in our ABA Services

Our team puts a primary focus on verbal and nonverbal communication skills, functional communication skills, social communication as well as increasing receptive language skills.

Play and leisure skills are essential for learning, social engagement and many skills can be taught through play and fun!

Social emotional understanding and regulation are vital skills for all individuals and can be taught through ABA. All individuals can learn coping strategies.

Daily living skills such as eating, dressing, toileting, brushing teeth, bathing and chores can be addressed and increased

Parents and caregivers are crucial members of our team. We instruct parents and caregivers in various methods to help increase consistency and opportunities for learning.

Community participation and safety can also be addressed in ABA sessions.
